## PROFESSIONAL SUMMARY

---

Senior Technical Project Manager and Production Leader with 15+ years of experience leading cross-functional teams, managing multi-million-dollar budgets, and delivering complex technology initiatives. Proven expertise in software development, IT infrastructure, cybersecurity, and agile project management. Track record of driving operational excellence across live, digital, and hybrid production environments while aligning technical solutions with strategic business objectives.

## PROFESSIONAL EXPERIENCE

---

### **Senior Director of Production / PMO Manager**

*HomeTeam Network* 2023 – Present

- Lead high-profile event and production initiatives, overseeing planning and execution of 80+ annual events with budgets averaging \$10K per event, totaling \$800K+ in annual production value
- Direct cross-functional teams of 5-15 staff members, ensuring seamless delivery across live, digital, and hybrid formats with focus on innovation and operational excellence
- Leverage 15+ years of technical expertise to align event strategies with organizational goals and implement cutting-edge production tools and methodologies
- Drive continuous process improvement initiatives resulting in enhanced efficiency and stakeholder satisfaction

### **Senior Technical Project Manager / Senior Software Tech Lead**

*Webonise Lab* 2021 – 2023

- Led concurrent software development projects valued at \$500K+, managing teams of 8 developers, 3 designers, and QA testers across 3 major client accounts
- Utilized Agile methodology to streamline project management processes, ensuring on-time delivery within budget and to client satisfaction
- Collaborated with cross-functional teams including data engineers and stakeholders to ensure project alignment with business goals and technical requirements
- Monitored project risks and proactively implemented corrective actions to mitigate potential impacts, maintaining 100% on-time delivery rate
- Designed and implemented software solutions, data management systems, network infrastructure, and security measures

### **Director of Technology, Data and Software**

*First Nations Education Initiative (FNEII)* 2010 – 2021

- Directed IT, data, and software initiatives for 15 First Nations communities, managing annual budgets of \$2-3M and leading team of 15 internal staff members
- Developed and executed comprehensive technology strategies, roadmaps, and budgets in alignment with organizational goals and community needs

- Led development and deployment of multiple data and software projects, resulting in improved service delivery, streamlined operations, and enhanced data management capabilities
- Provided technical leadership and strategic guidance on infrastructure modernization, cybersecurity practices, and digital transformation initiatives

#### **Information Systems Technologist (Part-Time)**

*Canadian Armed Forces 2022 – Present*

- Deploy, establish, administer, and maintain multi-platform networking computer environments for military exercises and operations
- Establish and maintain data and voice networks supporting user bases of 25-50 personnel in diverse operational contexts
- Provide rapid technical support and troubleshooting for mission-critical systems in time-sensitive environments

#### **Technology Consultant (Part-Time)**

*Mi'kmaq Confederacy of Prince Edward Island (MCPEI) 2013 – 2023*

- Provided IT infrastructure, data management, software development, and technical training services to 2 communities and 2 schools
- Designed and implemented technology solutions to improve operational efficiency and digital literacy. Delivered technical training programs to staff and community members

### **EDUCATION**

---

#### **Bachelor of Science, Computer Science / Software Development**

*Athabasca University | 2019 – 2024*

#### **Information Systems Specialist Diploma**

*New Brunswick Community College (NBCC) | 2010 – 2011*

#### **CompTIA Security+ Certificate**

*Skills Nova Scotia | June 2023 – December 2023*

### **TECHNICAL SKILLS**

---

**Project Management:** Agile Methodology, Scrum, Waterfall, Risk Management, Budget Management, Stakeholder Communication, Cross-Functional Team Leadership

**Software Development:** Full Stack Development, Software Architecture, Data Management Systems, System Integration, API Development

**IT Infrastructure:** Network Administration, Multi-Platform Environments, Voice and Data Networks, System Deployment, Infrastructure Management

**Cybersecurity:** Ethical Hacking, Network Security, Vulnerability Assessment, Security Best Practices, Threat Mitigation

**Tools & Technologies:** Project Management Software, Version Control Systems, Cloud Platforms, Database Management, Production Management Tools

**Leadership:** Team Building, Client Relationship Management, Strategic Planning, Financial Management, Process Improvement
